

SUPERIOR UV PRINT & CUT ON DEMAND

For premium labels and packaging prototypes

Creating Unique and Unparalleled Value

The VersaUV LEC2-300 integrated printer/cutter delivers unmatched versatility on demand with the vibrant richness and lifelike quality of UV printing together with precision contour cutting. It's the ideal solution for one-off and short-run production of custom labels, decals, prototypes and one-of-a-kind personalised items with a premium look on a wide variety of media. Take advantage of this unique flexibility to respond to your clients' diverse needs, delivering on demand and on time.

Versatility

for a Broad Range of Media Types

The ECO-UV ink used by the LEC2-300 is designed to adhere to a broad range of media, including adhesive sheets for stickers and labels, special PET or PVC-based substrates, and even textiles, thin paper, tarpaulin and more.

Contour Cut

Any Size and Shape

The LEC2-300 provides precision cutting as well as printing functions. This single device can automatically contour cut any shape around printed graphics, photos or text to produce adhesive labels, stickers, and custom-shaped displays without using a die punching machine. Precise and powerful cutting force ensures crisp, clean lines around even the most complex shapes. A Perforated Cut function allows adhesive media

to be die-cut, eliminating the post trimming process and speeding up production for fast turnaround jobs. Combined with the new "Multiple Print function" and a new precision media take-up system, high-volume jobs can be printed efficiently with unattended operation.

New Printhead and LED Lamps

for High-definition Printing

A newly developed printhead and LED lamps enable an even higher level of print quality. The new printhead is optimised for precision ink delivery and control. New, more powerful LED lamps make ink curing even faster. As a result, small text, elaborate textured patterns, gradations and other details are reproduced with high precision. By optimising the LED lamps' position, the LEC2-300 produces high quality images even in bi-directional printing mode for increased productivity".

Special Finishes

for Exceptional Effects and Realistic Textures

In addition to CMYK, the LEC2-300 can be used with Gloss and White ink configurations for exceptional, premium-value printing. Use clear (Gloss) ink to add special effects like embossing and gloss or matt finishes, or for producing lifelike custom-textured effects by simply overprinting multiple layers of Gloss ink. With 72 types of textured patterns included, it's easy to create stunning prints that would usually require the use of time-consuming special printing methods.

In all Standard Contractors and Standard Research Contractors and Standard Research Contractors and Contr

On-Demand,

One-Off Production

Unlike analogue printing processes which require plate making, design data can be simply output from a computer to the LEC2-300 via the included VersaWorks 6 RIP software. The entire print production process is quick and simple – print as many copies as required, when required. Urgent corrections or design changes can be printed immediately. Impress clients by providing a tailored service beyond their expectations, even for custom jobs with the tightest of deadlines.

More Opaque White Ink

with High-density Printing

The new printhead and LED lamps also help to increase ink density. The opacity of White ink in particular - often used as a base coat when printing on transparent films or dark materials - has been increased by up to 40%*. In addition, a new "HD (high density) mode" that increases the density of White ink compared to the normal printing mode makes it possible to select the optimal ink density to suit your production requirements.

Specifications						
Printing method		Piezo ink-jet method	Repeatability (when cutting) (*4) (*6)		±0.1 mm (±3.9 mil) or less	
Media	Width	182 to 762 mm (7.2 to 30 in.)	Alignment accuracy for		±0.5 mm (±19.7 mil) or less	
	Thickness	Max. 1.0 mm (39 mil) with liner, for printing Max. 0.4 mm (16 mil) with liner and 0.22 mm (9 mil) without liner, for cutting	printing and cutting (*4) (*7) Alignment accuracy for printing and		Error of less than ±0.5% of distance travelled, or ±3 mm (±0.2 in.),	
	Roll outer diameter	Max. 210 mm (8.3 in.)	cutting when reloading media (*4) (*8)		whichever is greater	
	Roll weight	Max. 25 kg (55 lb.)	Connectivity		Ethernet (100BASE-TX/1000BASE-T, automatic switching)	
	Core diameter (*1)	76.2 mm (3 in.) or 50.8 mm (2 in.)	Power-saving function		Automatic sleep feature	
Printing/cutting width (*2)		Max. 736 mm (29 in.)	Power requirements		AC 100 to 240 V ± 10%, 3.0 A, 50/60 Hz	
Ink	Type	ECO-UV (EUV4) 220 cc, 500 cc cartridges	Power consumption	During operation	Approx. 270 W	
		Six colours (cyan, magenta, yellow, black, white, and gloss)		Sleep mode	40 W	
	Colour	Four colours (cyan, magenta, yellow, and black)		During operation	63 dB (A) or less	
Ink-curing unit		Built-in UV-LED lamps x 2	Acoustic noise level	During standby	53 dB (A) or less	
Printing resolution (dots per inch)		Max. 1440 dpi	Dimensions (with stand)		1,934 (W) × 795 (D) × 1,303 (H) mm (76.1 [W] × 31.3 [D] × 51.3 [H] in.)	
Cutting speed		10 to 300 mm/s (0.4 to 11.8 in/s)	Weight (with stand)		119 kg (262.4 lb.)	
Blade force (*3)		30 to 500 gf		During operation	Temperature: 15 to 32°C (59 to 90°F), humidity: 20 to 80%RH (no condensation)	
Blade	Туре	Roland CAMM-1 series blade	Environment		Temperature: 5 to 40°C (41 to 104°F), humidity:	
	Offset	0.000 to 1.500 mm (0.0 to 59.1 mil)		Not operating	20 to 80%RH (no condensation)	
Software resolution (when cutting)		0.025 mm/step (0.98 mil/step)	Included items		VersaWorks 6 RIP software, dedicated stand, power cable, blade, blade holder, media clamps, media holders, replacement blade for separating knife, cleaning liquid, drain bottle, User's Manual, etc.	
Distance accuracy (when printing) (*4) (*5)		Error of less than $\pm 0.3\%$ of distance travelled or ± 0.3 mm (± 11.8 mil), whichever is greater				
Distance accuracy (when cutting) (*4)		Error of less than ±0.4% of distance travelled or ±0.3 mm (±11.8 mil), whichever is greater When distance correction has been performed (when the setting for [CUTTING MENU] - [CALIBRATION] has been made): Error of less than ±0.2% of distance travelled or ±0.1 mm (±3.9 mil), whichever is greater				

The media holders of this machine are designed to be used exclusively with media that has a paper tube (core) with an inner diameter of 76.2 mm (3 in.). To use 50.8 mm (2 in.) media, the optional media flanges are required. *2 The length of printing or cutting is subject to the limitations of the program. *3 • 500 gf is the maximum instantaneous blade force. • The blade force must be adjusted according to details such as the media thickness. *4 • Media type: Media specified by Roland DG Corporation • Temperature: 257 (77F), humidity: 50%RH • Roll media must be loaded correctly. • Applicable when all pinch rollers that can be used with the media with are used - Side margins. 25 mm (1.0 in) or more for both the left and right margins • Excluding expansion/contraction of the media is accuracy • For media with a width exceeding 610 mm (24,0 in); Length: 4,000 mm (157.5 in) • For media with a width of 610 mm (24,0 in.) or less · Excludes the effects of slanted movement and of expansion and contraction of the media *0 bat size: 1,000 mm (39.4 in.) in the media-feed direction, 736 mm (29.0 in.) in the carriage-movement direction • No lamination • Automatic detection of crop marks at four points when media is reloaded - During cutting, [PREFEED] menu item must be set to "ENABLE." • Excluding possible shift caused by expansion/contraction of the media. Second of used a couracy of the media is reloaded - During cutting, [PREFEED] menu item must be set to "ENABLE." • Excluding possible shift caused by expansion/contraction of the media is reloaded - During cutting, [PREFEED] menu item must be set to "ENABLE." • Excluding possible shift caused by expansion/contraction of the media and/or by reloading the media. Second exclusion of the media is reloaded - During cutting, [PREFEED] menu item must be set to "ENABLE." • Excluding possible shift caused by expansion/contraction of the media and/or by reloading the media. Second exclusion of the media is reloaded - During cutting, [PREFEED] menu item must be set to "ENABLE." • Ex

VersaWorks

Intuitive VersaWorks 6 Ensures Efficient Production

The LEC2-300 includes the latest VersaWorks 6 RIP & Print management software equipped with a user-friendly menu of functions to maximise performance so that high-quality printing can be performed immediately after installation.

VersaWorks 6 System Requirements						
Operating System	Windows [®] 10 (32/64-bit) / Windows [®] 8.1 (32/64-bit) Windows [®] 7 Ultimate / Professional (32/64-bit)	Free hard-disk space	40 GB or more recommended			
CPU	Intel [®] Core [™] 2 Duo, 2.0 GHz or faster recommended	Hard-disk file system	NTFS format			
RAM	2 GB or more recommended	Optical drive	DVD-ROM drive			
Video card and monitor	A resolution of 1,280 x 1,024 or more	Other	Internet connection recommended			

Options						
	Model	Description				
	EUV4-CY	Cyan, 220 cc				
	EUV4-MG	Magenta, 220 cc				
	EUV4-YE	Yellow, 220 cc				
	EUV4-BK	Black, 220 cc				
ECO-UV Ink	EUV4-WH	White, 220 cc				
ECO-OV IIIK	EUV4-GL	Gloss, 220 cc				
	EUV4-5CY	Cyan, 500 cc				
	EUV4-5MG	Magenta, 500 cc				
	EUV4-5YE	Yellow, 500 cc				
	EUV4-5BK	Black, 500 cc				
	EUV4-5GL	Gloss, 500 cc				
Cleaning liquid	SL-CL	Cleaner, 220 cc				
	ZEC-U5032	For general sign vinyl, 2pcs.				
Blades	ZEC-U5025	For thick, reflective, fluorescent and general sign vinyl, 5pcs.				
Blade holders	XD-CH2	Aluminium blade holder with blade depth adjustment.				
Didue Holders	XD-CH3	Resin blade holder with blade depth adjustment.				

Options

Automated take-up system

TU4-30 * Rolls up to 40 kg (88.2 lb.)

This device is capable of printing on a wide variety of substrates. However, the print quality or the ink adhesion may vary according to the substrate used and it is strongly recommended to test the substrate for compatibility to ensure optimal print results.

Vaporised components may slightly irritate the eyes, nose and/or throat during and following printing with this product. If continuously printing in a closed space, the density of volatile compositions will accumulate and may irritate the eyes, nose and /or throat. Roland DG strongly recommends that you install a ventilation system and use this product in a well-ventilated room. For more information, please contact your local distributor or dealer.

About White Ink Due to the nature of white ink, the pigment will settle in the cartridge and ink flow system, requiring you to shake the cartridge before each use.

Roland DG reserves the right to make changes in specifications, materials or accessories without notice. Actual output may vary. For optimum output quality, periodic maintenance to critical components may be required. Please contact your Roland DG dealer for details.
